TAGS   READERS   ANTENNAS   SYSTEMS

VISITOR MANAGEMENT SYSTEM

VisiTrak is an innovative and fully integrated registration solution for authentication, verification and tracking of visitors in or out of any given premises at the reception /entry & Exit points. In today's security environment, businesses, schools and government need to know and control WHO IS IN or COMING INTO THEIR BUILDINGS.All the features & more compared to other electronic visitor management systems at 30– 50% less cost.
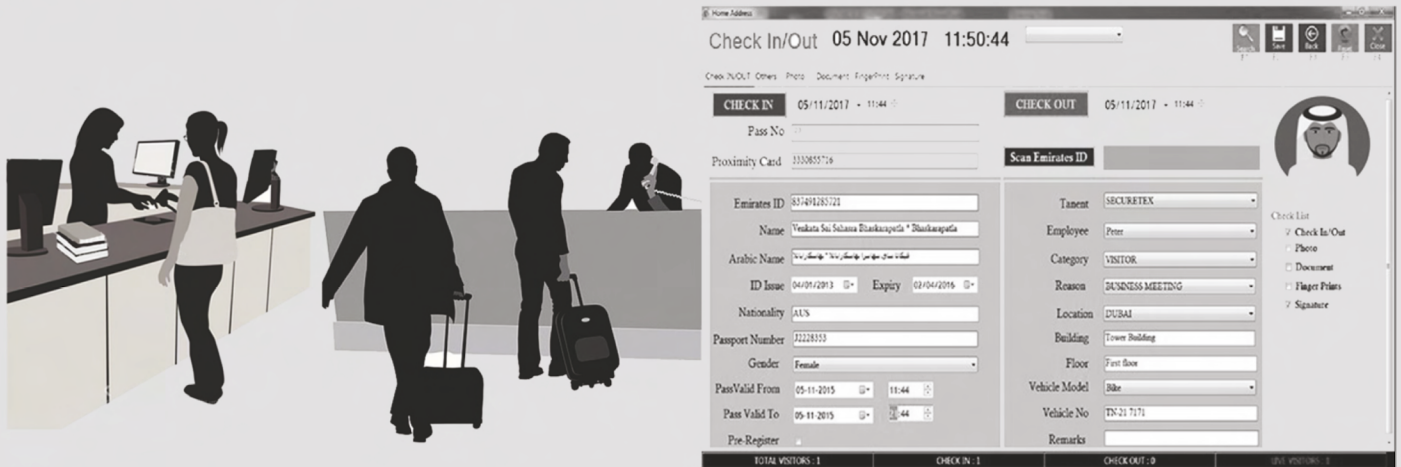

KEY FEATURES

Fast registration and check-out using the latest and most innovative ID readers available ie. Civil ID , Passport , License etc to capture visitor information without manual data entry.
Email and SMS notification to employee when visitor is checked-in or checked-out at front desk.
Track frequent visitors of employees and of the company.
Allows web-based visitors pre-registration by employees of the organization.
Uploads documents to attach to a visitor's profile like photos etc.

BIOMETRIC ACCESS CONTROL SYSTEM

State of the art access control system with the highest performance in face detection, finger print recognition, access control management, efficient time & attendance and abundant storage capacity help build the perfect security system

PEOPLE COUNTING SYSTEM

Every business with a physical space should count customer traffic in order to see the bigger picture of what is going on in their business. Whether you are at a shopping center, retail chain, museum, library, sporting venue, bank, restaurant or other. People Counting data will help you make well informed decisions about your business.

2D & 3D CAMERA
Placed on the ceiling, the 2D & 3D stereoscopic cameras, is one of the best sensors for counting people with immense advantages and the ideal counting solution in shops, tourist offices and establishments and shopping malls.

- Counting entries and exit
- Absolute accuracy (98%), no sensitivity to light variations and heat fluxes
  Avoids the counting of caddies and strollers
- The ceiling height can vary between 2.5 m & 11 m depending on the model,
- the ground detection width varies accordingly
- Remote setting
- Statistical data is available in real time in the shop and at headquarters.
